

OPEN INTERNET POLICY

Monroe Telephone Internet adopts this Open Internet Policy to promote the Internet as an open platform enabling customer choice, freedom of expression, end-user control, competition, and the freedom to innovate without permission.

No Unreasonable Discrimination: Monroe Telephone Internet does not unreasonably discriminate in transmitting lawful network traffic over a customer's broadband Internet access service, subject to reasonable network management. Reasonable network management practices are set out below.

Monroe Telephone Internet does not:

- Discriminate among specific uses, or class of uses, of its network
- Impair, degrade or delay VoIP applications or services that compete with its voice services or those of its affiliates
- Impair, degrade, delay or otherwise inhibit access by customers to lawful content, applications, services or non-harmful devices
- Impair free expression by actions such as slowing traffic from particular web sites or blogs
- Demand pay-for-priority or similar arrangements that directly or indirectly favor some traffic over other traffic
- Prioritize its own application, services or devices or those of its affiliates

No Blocking: Monroe Telephone Internet does not block lawful content, applications, services, or non-harmful devices, subject to reasonable network management. Network management practices are set forth below.

TERMS AND CONDITIONS OF SERVICE AND NETWORK MANAGEMENT PRACTICES

General: Monroe Telephone Internet manages its network to provide quality service to its customers. Monroe Telephone Internet cannot guarantee that it can prevent spam, viruses, security attacks, network congestion and other actions which can affect service, but does use various filters, monitoring efforts and other measures to minimize the effects of spam, viruses, security attacks, network congestion and other actions which can affect the service provided to customers.

Congestion: Monroe Telephone Internet has not experienced substantial problems with congestion. However, it may be possible that there are congestion events that may occur in the

future, particularly as it may be related to the service capacity from third parties used by Monroe Telephone Internet to provide the customer with access to the world. Such service capacity is outside the control of Monroe Telephone Internet.

Where feasible, Monroe Telephone Internet will address congestion issues through improvements to its network or the capacity purchased from other providers needed to connect to the outside world. Such processes take time to implement and may not be feasible in all situations. Therefore, Monroe Telephone Internet reserves the right to monitor and identify which customer accounts are using the greatest amount of bandwidth during periods of heavy congestion and to work to provide solutions to address those issues. If a preferred solution cannot be worked out with the customer or customers, Monroe Telephone Internet reserves the right to manage the Internet traffic of high volume customers during periods of significant congestion. This means that the affected customers will still be able to access the Internet and engage in activities that they desire, but during certain periods of time they may experience conditions such as longer times to download or upload files, slower access and slower movements during online game playing. It is expected that any periods of traffic management due to congestion will be brief and infrequent.

Use of Network: In no case will Monroe Telephone Internet discriminate among customers on the basis of the type of content, applications, services or devices which the customer uses.

Applications: Customers may use any lawful and commercially available application which they desire. Monroe Telephone Internet does not normally monitor the contents of the traffic or applications of the customers and undertakes no obligation to monitor or investigate the lawfulness of any specific application used by a customer.

Monroe Telephone Internet will only take steps regarding an application-specific behavior by a customer if there is a reasonable belief that the application will cause harm to Monroe Telephone Internet's network or is unlawful, including but not limited to, violating intellectual property rights.

Devices: A customer may use any lawful, compatible type-accepted and commercially available device which they desire on the network provided by Monroe Telephone Internet, as long as such device does not harm the network and is not unlawful.

Security: While Monroe Telephone Internet uses various security measures it deems appropriate, Monroe Telephone Internet undertakes no obligation to monitor or protect customer traffic from spam, viruses, denial of service attacks or other malicious, unlawful or unwarranted activities. Monroe Telephone Internet does not guarantee that it can protect customers from any or all security breaches. The customer is using this service at his or her own risk. Customers are cautioned to purchase their own spam filtering and antivirus software from commercial vendors to meet their needs. However, a customer that is subject to spam, virus, denial of service attack or similar malicious, unlawful or unwarranted activities is urged to contact Monroe Telephone Internet as soon as possible. Monroe Telephone Internet will work with the customer on how the customer can take appropriate and economically reasonable efforts to address the matter.

Other Matters: Other terms and conditions for use are found in Monroe Telephone Internet's Acceptable Use Policy (AUP) at www.monroetel.com/intpol.pdf.

PERFORMANCE CHARACTERISTICS

The pricing and other terms and conditions for the service provided by Monroe Telephone Internet can be found at www.monroetel.com/intdsl.html. The service provided is a DSL type of service consisting of fiber optic and copper digital facilities. Expected access speeds in the DSL portions of the network range from 1.5Mb to 4.0Mb, depending on the actual lengths of the respective fiber trunks and copper lines.

Actual access speeds and delay times or latency are impacted by the length, capacity and congestion of transport facilities purchased by Monroe Telephone Internet from third party providers. Monroe Telephone Internet cannot guarantee that it will be able to obtain capacity from these third party providers at commercially reasonable prices if and when additional third party capacity is needed to reach Internet nodes.

Monroe Telephone Internet's ability to deliver the speeds set forth above may be affected by significant use of specialized services such as Internet-based video services. This is a growing area and its effect on Monroe Telephone Internet's ability to provide service at the speeds listed above are unknown at this time.

PRIVACY

As a general statement, Monroe Telephone Internet does not usually entail inspection of network traffic. Monroe Telephone Internet does retain and store certain traffic information for time periods required by federal and state law, including, but not limited to, the identity of the customer using a particular IP address during a specific period of time. Monroe Telephone Internet does assist law enforcement and provides traffic information that it may have available to it when requested pursuant to the Communications Assistance for Law Enforcement Act, the Foreign Intelligence Surveillance Act and other applicable national and state security and criminal statutes.

MONROE TELEPHONE INTERNET DOES NOT COLLECT, STORE OR USE TRAFFIC INFORMATION TO PROFILE ITS CUSTOMERS IN ORDER TO SELL ADDITIONAL SERVICES TO THEM OR FOR NON-NETWORK MANAGEMENT PURPOSES.

COMPLAINTS

If a customer has complaints about the service, they are urged to contact our business office at 541-847-5135 or Monroe Telephone Company, PO Box 130, Monroe, Oregon 97456. A customer always has the right to file a complaint with the Federal Communications Commission at www.fcc.gov.

RESERVATION OF RIGHTS/AMENDMENTS

In the event of any conflict between material found on other links on Monroe Telephone Internet's web site and this Open Internet Policy, the more specific terms at the other links shall control.

Monroe Telephone Internet may modify this Policy and other policies it has linked for the customer from time to time at its discretion. Notice of such changes will be posted on this web site. However, individual notice to customers, content providers, application providers, service providers or device providers by any means whatsoever shall not be provided unless specifically required to by federal or state law. Notice of changes will be provided in advance normally upon a thirty day basis. However, Monroe Telephone Internet reserves the right to use a shorter notice period when circumstances so warrant.
